Company overview

PROJECTSEVEN LTD. CO. (projectseven) is a veteran-owned small business in Yukon, Oklahoma. The company designs and builds custom software, hosts and maintains the systems it delivers, advises on technology decisions, and produces laser-etched signs and marked parts.

Clients work with one team from first scoping conversation through delivery. Work is documented, and the client hears status as it proceeds. projectseven takes a limited number of engagements so the people doing the work stay reachable.

Services

Technology Consulting
Review of current systems, workflows, and vendors, followed by a practical plan, including where AI fits the work and where it does not.

Custom Programming
Web applications, APIs, dashboards, automation, and integrations, built to stated requirements and supported after launch.

Managed Hosting
Hosting for websites and applications, with monitoring and routine maintenance by the team that supports what runs there.

Ongoing Support
Continuing advisory, maintenance, and new work from people who already know the environment.

Laser Etching & Signs
Nameplates, safety and wayfinding signs, plaques, and marked parts, etched to client artwork or to a layout prepared with the client.
